

THE ROULETTE BIAS SYSTEM:

The Odds Are In YOUR Favour.

THE ROULETTE BIAS SYSTEM

Please note that all information is provided 'as is' and no guarantees are given whatsoever as to the amount of profit you will make if you use this system. Neither the seller of this system, the publisher or any affiliates can be held responsible for any profits or losses from following this information, all betting involves an element of risk and you should never bet with money you cannot afford to lose. Please note that information is based on the date written and the opinion of the author, as publishers we cannot guarantee any information is correct when you read it.

Introduction

Congratulations on purchasing the Roulette Bias System, you are one of the lucky few who have access to a system that can finally put the odds in YOUR favour, this system is brand new and unique and has been creaming £1000's a week into the bank accounts of people in the know.

Now you are one of those people!

You are about to learn all the secrets the casino's don't want you to know and more importantly you can find out exactly where to place your chips in order to have the highest chance of making yourself a fortune.

Through painstaking research I have managed to uncover a definite bias on the roulette wheel and now you too will learn this and have a far greater chance of winning than you could have ever dreamed of.

Many people believe roulette to be a random game in which any number on the table has an equal chance of occurring and therefore the chances of a number occurring are 37/1. As most casinos pay out at 35/1 the casino always wins. However online roulette, despite what you may have previously thought, is NOT a completely random game.

Here is something you may not know:

FACT – A computer CANNOT pick numbers completely at random!

It is a known fact that random number generators (RNG's) that are used by casino companies are not random at all. They are what are known as pseudo random and therefore each casino will have a definite bias to the wheel and some numbers will occur at far better odds than 37/1. This system is designed to reveal the numbers you **really** want to be betting on at odds that are in **your favour, not the casinos.**

Ideally the casino owners would have the software capabilities of producing a definite random outcome. As explained earlier, this would ensure the casino always won, as they place the odds in their favour paying out 35/1, rather than 37/1. Unfortunately for the casino the software is incapable of producing the desired effect of a real random outcome. The casinos will still win as they pay out way under the real odds of an outcome, so they can afford a small margin of error.

The only way a player can possibly win is to know which numbers are more likely to occur than others, and thanks to this system you will learn vital information.

I have spent the last three months researching one casino in particular and have collected results from my last 5000 spins of the wheel. From these results I think it is clear that this roulette wheel is biased.

This would not be obvious to the average player, but to those who extensively research the behaviour of a roulette wheel it is apparent that a profit is more likely to occur if you bet on the most common numbers.

I have done my research on Lucky Ace Casino. I have chosen this casino as it isn't one of the main players in the casino field and therefore it has proven in testing to be a more biased wheel than some of the more well known casinos.

Another advantage is that Lucky Ace Casino does also not have the same strict withdrawal restrictions as some of the major casinos and therefore **roulette does count towards your wagering** requirement of their bonus offer of \$200.

They are clearly a more relaxed casino for their Terms and Conditions as they haven't been "abused" like the big boy casinos, that is... until NOW!

To join Lucky Ace Casino and receive their welcome bonus simply visit their offer below.

If you go to the next page you will see there is a step by step guide to joining the casino for all you technophobes out there!

<http://www.luckyaceoffer.com>

Use the exact link above or type the address into your browser to get the \$200 bonus that **can** be turned over playing roulette.

How To Join

When you visit www.LuckyAceOffer.com You should see the page below, a button will appear to download the casino, click OK to continue. After that click Run to install the casino.

The screenshot shows the LuckyAceCasino.com website interface. At the top, the date is Friday, September 12, 2008, and the language is set to English. The main header features the LuckyAceCasino.com logo and the tagline "let the games begin". A navigation menu includes links for Download, Home, Getting Started, Help, Security and Privacy, Players Club, Affiliates, and 24/7 Support. The main content area displays a promotional offer of "100% up to \$200 NOW!" and a woman named Amanda who says, "Hi! I'm Amanda. I'm here to make sure you'll have a wonderful time... Enjoy the ride!". A dialog box titled "LuckyAceCasino" is overlaid on the page, asking the user to "Click OK to download our free casino while browsing the site." with "OK" and "Cancel" buttons. Below the main content, there are sections for "News" (Happy Hours, Bank-a-Bonus), "Play Online Casino Games!" (Video Slots, Slots, Craps, Roulette, Blackjack), and "Call customer care +350 200 77602" with a "24/7 support" icon. The footer contains a comprehensive list of links including Home, Privacy policy, Getting Started, Help, Security and Privacy, Players Club, BlackJackSchool, Affiliates, Responsible gambling, Contact Us, and About.

You will then see the screen below. On the right-hand side of the screen click the download button. On the screen that follows click Next to install. As you can also see below you can get up to \$200 as a welcome bonus on your first game, I highly recommend you take advantage of this as the bonus and turn it over playing roulette.

Download LuckyAceCasino.com in 3 Easy Steps

This quick start page will guide you through our fast and easy download and installation process. For more detailed instructions, please visit our [Getting Started](#) section.

LuckyAceCasino.com does not allow anyone under the age of 18 to play its online games. To learn more about LuckyAceCasino.com's initiatives, visit our [Responsible Gaming](#) page.

Download - YOU ARE HERE

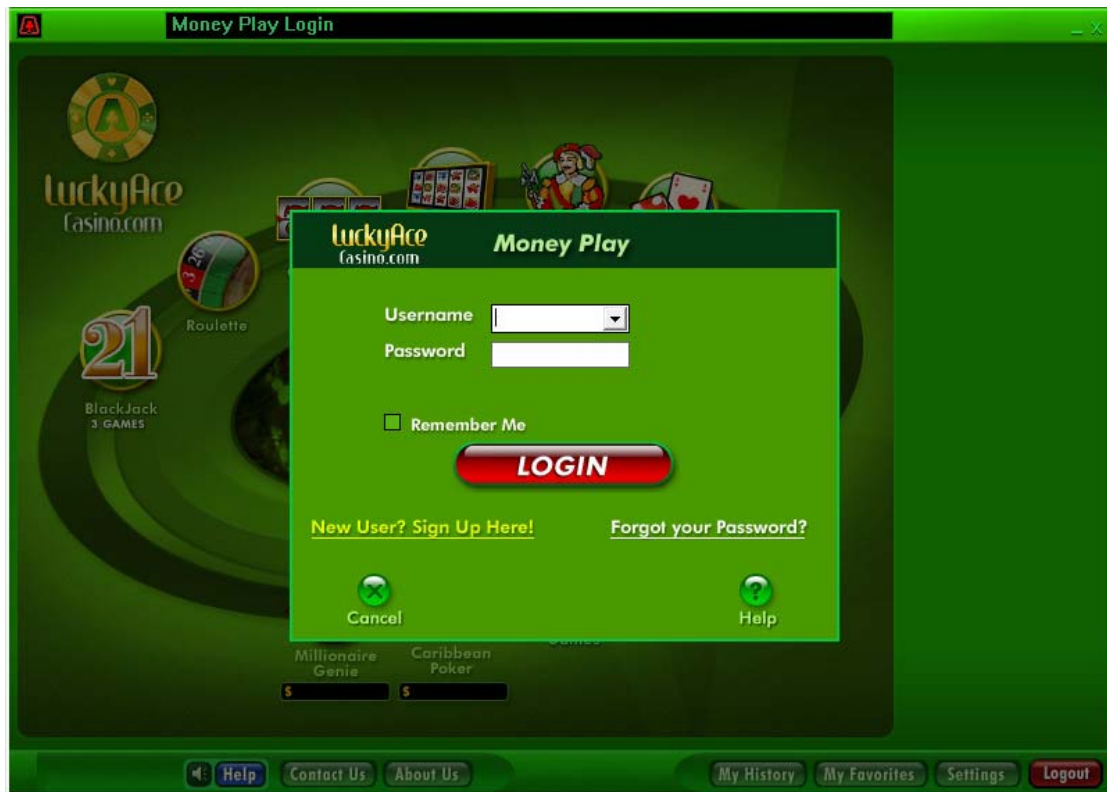

- 1 » A dialog box appears. If the box does not appear automatically, click on the download button on the right of this page to begin the download.
» Click on Run and follow the prompts to start the installation process. This may take a few minutes depending on your internet speed.
» If the dialog box does not appear, click on "Download" to restart the download process.
» You can also contact our Member Support for assistance.

Once everything is installed the screen below will appear, all we need to do now is register. First of all select Money Play. If you wish to practice and familiarise yourself with the system you can also select Practice Play and play with demo chips until you are ready to play for the big money!

To obtain your Username and Password you need to sign up as a New User by clicking the link highlighted in yellow below.

You will then be asked to fill in your details on the form below. Fill in these details.

The image shows a web browser window titled "Money Play Registration" for LuckyAce Casino. The page has a green and black theme. On the left, there is a sidebar with the LuckyAce logo and images of roulette and blackjack. The main content area contains a registration form with the following fields: Preferred Username, First Name, Last Name, Email, Age, Gender (radio buttons for M and F), Address, City, Country (dropdown menu), State (dropdown menu), Zip Code, and Phone. There are also buttons for "Already a Member?", "24/7 Live Chat Support", "Cancel", "Submit Registration", and "Help". At the bottom of the form, there is a checkbox for "I am over 18 years of age and I accept the Terms & Conditions". The footer of the page contains navigation links: Help, Contact Us, About Us, My History, My Favorites, Settings, and Logout.

Now that you are registered you have access to the casino. Now it is time to head over to the cashier to collect your welcome bonus! Simply Click CASHIER in the bottom left hand corner.

You will then see this screen, click Deposit.

You now have the option to deposit using a variety of methods. For this system to work I would recommend depositing a minimum of \$100 (£55).

The screenshot shows the 'CASHIER' page for LuckyAce Casino. The main heading is 'Deposit'. On the left, there are several deposit method options: 'Credit/Debit Card' (with Visa and MasterCard logos), 'Solo & Maestro', 'PayPoint', and 'More Deposit Methods'. A 'Deposit By Phone' button is also visible. The central form is for card deposits and includes the following fields:

- * Amount to deposit: US\$ [input field] (with a 'Deposit Limits' link)
- Your account will be debited £0.00 (with an 'Exchange Rate' link)
- * Card type: [Dropdown menu showing 'Visa']
- * Card number: [input field]
- * Security code (CVV): [input field]
- * Expiry date: [MM] [YYYY] (with dropdown menus)
- * Cardholder's first name: [input field]
- * Last name: [input field]
- Billing address: [input field] (with a 'Change My Address' link)
- * Telephone: [input field]

 A 'Submit' button is located at the bottom right of the form. On the right side, there is a 'HELP & SUPPORT' sidebar with a 'Live Help' button, a toll-free number (0800 404 7748), and a 'Contact Us' link. The footer contains links for 'About Us', 'FAQ', 'Self Deposit Limits And Self Exclusion', and 'Confirm Your ID'.

Once you have deposited you will also receive a bonus of \$100 (£55) meaning you have doubled the amount of money to play, this is an excellent start to securing a decent profit with this method.

See the table below to see what bonus you can grab depending on your deposit. As you can see the more you deposit the more free money you have as a bonus.

Deposit	Bonus	Total
\$100	\$100	\$200
\$150	\$150	\$300
\$200	\$200	\$400

When you return to the casino lobby you will see that 25% of your bonus has been credited. As you can see I deposited \$100 and I now have \$125. You will receive the remaining 75% of the bonus once you have reached the required amount of comp points, which you can track in your account easily.

Now we are ready to get to the Roulette table! Simply click the Roulette button in the lobby, select private table and you are all set!

And so on to the system, read this carefully and please refer to the FAQ if you have any questions.

The Roulette Bias System

In choosing to read this ebook you have already made £100 and you can decrease the odds of a number hitting from 37/1 to as low as 21/1, so give yourself a pat on the back.

As already mentioned the casino pays out at 35/1 so by betting on odds as low as 21/1 you are statistically more likely to make much more money than you lose in the long run.

You should be aware that this pattern will not last forever and this system should be tried right now before the casino changes the RNG software.

But Don't Panic! To update the software takes time and I have inside information that many casinos will not change their software for months on end.

The only reason they would change it is if their profits went down by a large amount. As you are only one of a small select group of people to have access to this information, Lucky Ace couldn't care less if a few people make a few grand, they are making plenty from other players throwing away money on slots and other games where the casino can only win as the jackpot is progressive.

Another thing to remember is that you are NOT doing anything illegal and you are entitled to your winnings. All Lucky Ace can do is tell you to leave, but as long as you follow their terms and conditions (which you are doing) **they are under legal obligation to pay you your winnings**, after they pay you they may ban you but by that time you will have a few grand in your bank and you won't care less.

Now on to the stats. On the following page is a record of how many times each number occurred over 5000 spins.

Statistics Recorded Last Month At Lucky Ace Casino For 5000 Spins.

Number	Hits	% of Total Spins
0	75	1.5
1	120	2.4
2	130	2.6
3	125	2.5
4	190	3.8
5	215	4.3
6	125	2.5
7	125	2.5
8	95	1.9
9	125	2.5
10	155	3.1
11	195	3.9
12	145	2.9
13	165	3.3
14	175	3.5
15	115	2.3
16	125	2.5
17	105	2.1
18	130	2.6
19	155	3.1
20	155	3.1
21	125	2.5
22	120	2.4
23	110	2.2
24	120	2.4
25	115	2.3
26	135	2.7
27	135	2.7
28	185	3.7
29	85	1.7
30	155	3.1
31	105	2.1
32	155	3.1
33	140	2.8
34	80	1.6
35	130	2.6
36	160	3.2

From the stats above we can see that some numbers occur far more often than others and some numbers don't occur very often at all. If you were to bet on zero you would only get a hit rate of 1.5%. In plain terms you would win 15 times for every 1000 spins. If you bet £1000, betting a single £1 each time you would win at 35/1 15 times, making a total of £525. Therefore betting on zero would have resulted in a £475 loss.

On the other hand if you had bet on the most common number '5' the hit rate is 4.3%. In this instance you would win 43 times if you played 1000 spins of £1 on the number five. $43 \times 35 = £1505$. Therefore if you had chosen this number you would have made £505.

Betting on one number is time consuming and would take a long time to reach the high profits I know you want, therefore the Roulette Bias System focuses on the 5 most common numbers that have occurred in this testing.

Which are as follows:

5, 11, 4, 28 and 14

In order to add more safety to the system it is important to place \$1 on each (both) red and black and spin 10 times before beginning to place bets on the five most common numbers.

If any of the above numbers occur in the first ten spins it is important to replace the numbers that come up with the next most common numbers in the data collected.

The next most common five numbers are listed below if you need to change any of the above. Replace them in the order they appear below.

13, 36, 10, 19 and 20

So For example if I spin the wheel ten times and 5 and 11 both come up, I would replace those numbers with 13 and 36. Therefore the five numbers I would start with would be below.

4, 28, 14, 13 and 36

Once you have done your initial 10 spins you will have the five numbers you should stick to until you have a profit you are happy with.

Tip: If a number out of your five occurs twice in a row, you should replace it for the next number in the sequence as no number in our testing ever occurred three times in a row, therefore keeping that number would be unwise for the third turn. You can revert back to the original number after the third turn.

For Example, if I spin the wheel twice and the number 5 occurs twice in a row, I would then replace the 5 for 13 for the third spin. Once that spin had gone I would revert back to the 5.

To guide you through the system I have recorded my casino session below. Please follow this carefully so you know exactly how to bet. If you are unfamiliar with the rules of roulette, I would recommend that you first visit the page below which has clear rules for the game.

http://www.casinobrowser.co.uk/european_roulette_rules.htm

Step 1

Place A \$1 Chip On Red And Black And Then Spin 10 Times.

My first ten spins can be seen on the screenshot below and feature the following numbers, 31,30,2,24,22,36,13,20,26 and 36.

None of the numbers are the same as the five most common numbers (5, 11, 4, 28 and 14) so I stick to these numbers. I will be placing a \$1 Chip on 5, 11, 4, 28 and 14. Remember if one of these five numbers occurs in your first ten spins replace it with the next most popular number according to the statistical data.

After placing a \$1 chip on each of my five numbers I win on my first spin! A profit of \$36 dollars!

What a great system, already more than \$50 up in a matter of minutes. Now please don't get disheartened if your numbers don't occur on the first spin, it may take a few more spins, but remember this system is designed to put the odds in your favour.

After playing for a short while I have more than doubled my initial deposit. At this stage I haven't even received my full bonus once that gets credited I will have \$300, not bad for a day's work.

On returning to the casino the next day I now have my bonus credited and things go from good to great as again my numbers keep coming up! I now have over \$500!

I have been at it for a few hours, you should be warned that it can get tiring making all this money, lol. I am now over my target profit for the day and in need of a rest. \$1267 is good enough for me. Remember don't get too greedy!

After a week at the roulette table you should be ready to cash your winnings out. I used the casino for a week, playing just a few hours a night and I finished with over \$5000, not bad for a weeks work. It will certainly pay for a nice holiday!

So there you have it a simple strategic method to gain a very decent profit in no time at all. If you have a spare \$100 - \$200 I suggest you do the same and head over to

<http://www.luckyaceoffer.com/>

FAQ

What do I do if I hit zero on my first ten spins?

If zero occurs in the first ten spins you will lose \$1. This is nothing to be worried about as the chances of this happening are miniscule as we know from our testing that zero is the lowest occurring number.

You say the statistics were recorded last month, how long will this data be relevant?

The data is likely to be relevant for a long time after this date, how long we can never be sure. You have to decide if you think it is worth investing \$100 - \$200 for \$5000. It's your choice.

I am having trouble withdrawing my winnings, can you help?

Lucky Ace Casino has live help, simply click on the link and they will guide you through the withdrawal process.

Should I increase my bet if I lose to cover my losses?

This is a dangerous strategy and will not work as all roulette wheels have table limits, this particular one is \$300. This system sticks at the lowest bet on five numbers possible and you bet at level stakes, which is a much safer strategy.

Will this information get me into any trouble?

No, Not at all! Collecting statistical data is completely legal, you are not doing anything wrong by using this system. **It is true that the casino can ban you without reason, but they are under legal obligation to pay you your winnings.**

Does this system work at other casinos?

I would be very surprised if this exact system worked at other casino's as the data was collected at the lucky ace casino specifically.

But if you want to try collecting data for other casino's then the ones that are least likely to ban you can be found on the below site

<http://www.casinobrowser.co.uk/>

If you want to try and collect your own data for more casino's and try the system in more casino's to collect £10,000's then sign up as usual to the casino you want to collect data for. You can then bet the minimum on both red AND black for 5000 spins and record exactly which numbers come up.

You can then see where the bias on the wheel is by simply checking which number came up most in the 5000 spin test.

Does this system work in a live casino?

No, live casinos do have definite patterns if the croupier is throwing the ball in a certain way, however this is hard to monitor and certainly hard to pull off without arousing suspicion.

I don't understand your system, what do I do?

I would recommend reading the manual a few times to ensure you know exactly what to do, scroll back up to the top of the page and follow the system step by step with the actual software in demo mode until you are completely confident using it and of course reaping the huge rewards!

HAVE FUN AND ENJOY YOUR TAX FREE WINNINGS!
